

Position : PHP Laravel Developer

We are seeking a qualified and enthusiastic PHP Laravel Developer to join our team. The ideal candidate will be a computer science graduate with a minimum of 1 year of experience in developing CRM & ERP web applications. The candidate should possess strong technical skills, a proven track record in PHP web development, and the ability to collaborate effectively with a team.

Key Responsibilities :

- Utilize Laravel framework to design, develop, and maintain web applications.
- Collaborate with the team to design and implement new features.
- Write clean, efficient, and maintainable code.
- Troubleshoot and debug issues in existing applications.
- Implement and maintain third-party integrations and APIs.
- Demonstrate a proven track record of developing websites using PHP.
- Work with PHP to build robust and scalable applications.

Requirement Skills :

- Minimum 1 year of experience as a Laravel Developer.
- Good understanding of Object Oriented Programming.
- Strong proficiency in PHP, MySQL, HTML, CSS, JavaScript and jQuery.
- Strong problem-solving skills and attention to detail.
- Good understanding of RESTful APIs and API design principles.
- Experience with version control systems, such as Git.
- Excellent communication and collaboration skills

Bonus Skills:

- Basic Understanding of Livewire.
- Experience with other PHP frameworks like Symfony or CodeIgniter.
- Familiarity with AWS or other cloud platforms.
