Job Brief

We are looking for a PHP Developer responsible for managing back-end services and the interchange of data between the server and the users.

What does an “Junior PHP/Laravel Developer” do?

Your primary focus will be the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

Duties & Responsibilities

- Develop, record and maintain cutting edge web-based PHP applications on portal plus premium service platforms

- Build innovative, state-of-the-art applications and collaborate with the User Experience (UX) team
- Ensure HTML, CSS, and shared JavaScript is valid and consistent across applications
- Prepare and maintain all applications utilizing standard development tools
- Utilize backend data services and contribute to increasing existing data services API
- Lead the entire web application development life cycle right from concept stage to delivery and post-launch support
- Convey effectively with all task progress, evaluations, suggestions, schedules along with technical and process issues
- Document the development process, architecture, and standard components
- Coordinate with co-developers and keeps project manager well informed of the status of development effort and serves as a liaison between development staff and project manager
- Keep abreast of new trends and best practices in web development

Requirements and Qualifications

- Previous working experience as a PHP / Laravel developer for a min. of 1 year.
- BS/MS degree in Computer Science, Engineering, MIS or similar relevant field
- In-depth knowledge of object-oriented PHP and Laravel 5 PHP Framework
- Hands-on experience with SQL schema design, SOLID principles, REST API design
- Software testing (PHPUnit, PHPSpec, Behat)
- MySQL profiling and query optimization
- Creative and efficient problem solver
